

mLL2 Fab' conjugated to the exotoxin PE38KDEL induced complete remissions of measurable human lymphoma xenografts (CA-46) growing in nude mice (Kreitman et al., Cancer Res., 53: 819 (1993)).

The abstract for the cited Kreitman references is appended hereto, and clearly states that PE38KDEL is "a derivative of Pseudomonas exotoxin (PE) which does not bind to the PE receptor." Accordingly, applicants respectfully submit that the term recited in the specification "PE38KDEL" is the name of a protein molecule and does not constitute the disclosure of an amino acid sequence pursuant to 37 CFR § 1.821, and that the instant application is fully in compliance with the requirements of 37 CFR §§ 821-825 .

The Examiner is invited to telephone the undersigned at the number listed below if the Examiner believes such would be helpful in advancing the application to issue. If any additional fees are required for the filing of this paper, Applicants authorize the Commissioner to charge any deficiency to Deposit Account No. 08-1641.

Respectfully submitted,

By _____
